Subject: Update from Pam
Date: Tuesday, September 12, 2017 2:10:18 PM

Hey all,

Had a really good conversation with Pam this afternoon. She and LaTonya are now stationed in Port Arthur, TX – they are living in trailers.

They have been assigned to support Port Arthur and Beaumont.

They are spending their days meeting with community members, listening to their issues and concerns, and providing them resource information.

They are encountering people who are flood impacted – dealing with lack of drinkable water and mold and in unlivable conditions. Many of the flood impacted areas populations have high rates of poverty and that had historical environmental and health-related impacts (i.e. high asthma rates near oil refineries).

Former NEJAC member, Hilton Kelly, has been an asset in helping them to gain entrée into some of the impacted areas of Port Arthur.

I told Pam that we miss her, but really appreciate what she is doing.

If you need to reach her, Pam is accessible via her email intermittently.

Thanks,

Althea M. Moses
